LEARNING WITHOUT LIMITS · SPECIALIZATION CERTIFICATE

JOHNS HOPKINS UNIVERSITY

4 Courses

Fundamental Neuroscience for Neuroimaging

Principles of fMRI 1

Principles of fMRI 2

Introduction to Neurohacking In R

Aug 21, 2024

Mina Ahmadian Najafabadi

has successfully completed the online, non-credit Specialization

Neuroscience and Neuroimaging

Congratulations! You have completed all four courses of Computational Neuroscience - a Johns Hopkins Specialization. As part of this Specialization, you have learnt the fundamentals of neuroscience and neuroimaging, as well as how to implement neurohacking in R. You now have a firm foundation in principles of fMRI, as well as structural and functional human neuroanatomy, cognitive domains, and experimental design in functional neuroimaging.

Tor Wager, PhD
Diana L. Taylor
Distinguished Professor
Department of
Psychological and Brain
Sciences
Dartmouth College

John Muschelli III
Assistant Scientist
JHSPH Biostatistics
Department

Martin Lindquist, PhD,
MSc
Department of
Biostatistics
Bloomberg School of
Public Health
Johns Hopkins
University

Ciprian M. Crainiceanu
Professor
JHSPH Department of
Biostatistics

Dr. Elizabeth Sweeney
Rice Academy
Postdoctoral Fellow
JHSPH Department of
Biostatics

Arnold Bakker, PhD
AssociateProfessor
Psychiatry and
Behavioral Sciences
